

Observation schedule:*

September 2014

Duration of night:

9 hours

Telescope Zeiss-600 "North"

Lunar phases															
Date	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
1. Extrasolar planet	F	F	F	F	F	F	F				F	1/2		1/2	1/2
2. Asteroids (NAOJ)												1/2	F	1/2	
3. NEOs															
4. Pleades															1/2
5. Urgent observations	30 m	30 m	30 m	30 m	30 m	30 m	30 m				30 m	30 m	30 m	30 m	30 m

Lunar phases															
Date	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30
1. Extrasolar planet	F			1/2	F				1/2			1/2	1/2	F	1/2
2. Asteroids (NAOJ)		F	1/2			1/2	1/2			1/2	F				
3. NEOs															
4. Pleades	1/2		1/2	1/2		1/2	1/2	F	1/2	1/2		1/2	1/2		1/2
5. Urgent observations	30 m	30 m	30 m	30 m	30 m	30 m	30 m	30 m	30 m	30 m	30 m	30 m	30 m	30 m	30 m

- Allocated time
- Time is allocated for telescope maintenance. No observation time is available
- Allocated time for urgent observations
- Time not allocated

p.m. - until middle night **a.m.** - after middle night

	Colaborators	Colaborator from UBAI
1. Extrasolar planet	M.Ibragimov , AI, Russia	R. Karimov
2. Asteroids (NAOJ)	F.Yoshida , NAOJ	K. Ergashev
3. NEOs		
4. Pleades	A. Magnitskiy , MSU SAI, Russia,	
5. Urgent observations	No	Scientific council of Astronomical institute

*** With accordance to international regulation the observational time which was not used by the observer due to technical problems or weather condition is nontransferable.**
